

How to Use the eScan for Paper Ballots

The eScan is a digital scanner that reads paper ballots.

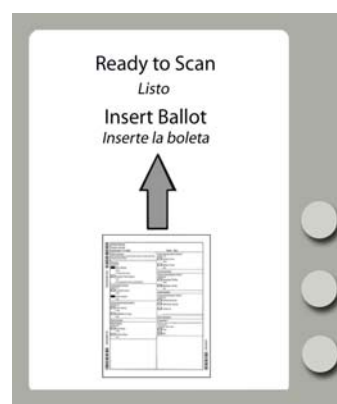

- ▶ To view **How to Vote eScan** video, [click here](#) (requires high speed connection).
- ▶ To view **How to Vote eScan** slideshow, [click here](#) (requires PowerPoint software)

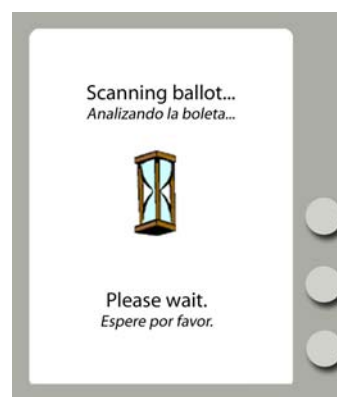

1. When you have finished marking your paper ballot, take it to the eScan machine at your polling place and insert it into the ballot feed slot.

2. The eScan displays **Ready to Scan** when the machine is available for the next ballot.

3. Wait while the **Scanning Ballot...** message is displayed.

4. Respond to any Voter Instruction messages.
 - ▶ If the ballot is *properly marked*, eScan accepts the ballot and displays the waving American flag to indicate that the ballot has been recorded.
